

AI PLAYBOOK · FOR LOCAL BUSINESSES

The Local Business AI Playbook

3 AI automations that stop you losing customers to a missed call, for salons, restaurants, trades, gyms and shops. No big budget needed.

Missed calls that turn into lost customers. Every caller gets a reply, even when you're too busy to pick up.

Steal it in 5 minutes

START HERE

Every missed call is a customer lost.

You're busy running the business, so you can't answer every call or reply to every message. But every missed call is someone who just called the next business. AI fixes this without a big budget. These are 3 simple automations we build for local businesses today. Read it in 5 minutes. Steal what fits, or let us build it for you.

WHAT'S INSIDE

1 The Missed-Call Text-Back

The second you miss a call, the caller gets a friendly text, and the chat continues.

2 The 24/7 Booking Agent

An AI answers and books customers around the clock, even after hours.

3 The Review Engine

Turns your happy customers into 5-star Google reviews, the right way.

► TWO WAYS TO DO THIS

Each automation names easy tools you can try yourself. Here's the honest difference:

- **Try it yourself:** simple, low-code tools (Brevo, Synthflow, Make). Perfect for testing the idea.
- **Done by us:** pro-grade tools, EU-hosted, wired together so it just works, and every AI assistant says it's AI (ready for the 2026 EU rules).

The Missed-Call **Text-Back**

THE PROBLEM

You miss a call while serving a customer. That caller almost never tries twice. They just call the next business on the list, and you never even know it happened.

WHAT IT DOES

The second you miss a call, the caller gets a friendly automatic text, and the conversation carries on by message.

WHAT CHANGES

Missed calls become text chats instead of lost customers, with no extra work from you.

Instant

A missed call becomes a text chat in seconds, not a customer who is already gone.

⚡ **Insider:** people now prefer a text to a call (EZ Texting), so a missed call that turns into a text often converts better than the call would have. The trick is a phone setup that fires the text instantly.

► DO THIS FIRST

Steal this missed-call text. Send something like it automatically the moment you miss a call:

"Hi, sorry we missed your call! This is [Your Business]. How can we help? Reply here and we'll sort it out."

EASY TOOLS TO TRY: Brevo · your business number

The 24/7 Booking Agent

THE PROBLEM

People want to book in the evening or at the weekend, exactly when there's nobody there to answer the phone. Those bookings go to whoever picks up.

WHAT IT DOES

An AI voice agent answers 24/7, tells callers it's an AI assistant, handles the common questions, and books straight into your calendar, even after you close.

WHAT CHANGES

Bookings come in around the clock, with no extra work from you or your team.

24/7

Answer and book customers day and night, with most calls handled automatically.

⚡ **Insider:** most booking calls come exactly when you can't pick up, mid-service or after you've closed. That's not a small edge case, it's most of them.

► DO THIS FIRST

These 5 questions cover most calls. Write your answers and the agent can book for you:

- What are your opening hours, and where are you?
- How much does your main service cost?
- What is your soonest availability?

EASY TOOLS TO TRY: Synthflow · Vapi · Google Calendar

The Review Engine

THE PROBLEM

Happy customers rarely leave a review on their own. So when someone searches nearby, the business with more stars wins, even when yours is the better choice.

WHAT IT DOES

After a visit it invites customers to leave a Google review, and gives you a separate, private way to catch and fix problems early. It asks everyone, not just the happy ones.

WHAT CHANGES

More 5-star reviews, more trust, and more new customers picking you over the competition.

5-9%

more revenue from lifting your rating by one star, for an independent local business (HBS).

⚡ **Insider:** most people read reviews before choosing you. But never filter unhappy ones out before Google, it breaks Google's rules and can wipe every review you have. Ask everyone, fix problems privately.

► DO THIS FIRST

Three rules turn happy customers into 5-star reviews, the compliant way:

- Ask every customer, not just the happy ones, right after they pay.
- Send one message with a direct, one-tap Google link.
- Catch unhappy feedback on a private form, to fix it, not hide it.

EASY TOOLS TO TRY: Google Business Profile · Brevo

The magic isn't one automation. It's when they **connect**.

Each one helps alone. The real jump is when they work together: one simple system that catches, books and grows, without you lifting a finger.

⚡ **Insider:** the win is one system, not four apps that don't talk to each other. When the text-back, the booking and the reviews share one place, nothing falls through, and you get your evenings back.

► WHERE MOST BUSINESSES START

You don't switch it all on at once. The order that pays off fastest is:

- Start with the missed-call text-back. It plugs the biggest leak in a day.
- Add the 24/7 booking agent, to turn callers into bookings.
- Turn on reviews last, to bring the next customer in.

YOUR NEXT STEP

Want these built for your business?

- 1 Follow **@arcangelo.automis** for daily, simple AI tips you can actually use.
- 2 Want the full setup done for you? Book a free call and we'll show you exactly what fits your business.

WANT TO BUILD IT YOURSELF?

You can. The easy tools here get you started. The catch is the time: wiring each piece together and testing it until it works takes weeks. We build it with pro-grade, EU-hosted tools so it's reliable and GDPR-safe from day one.

Book a free call

15 minutes, free, no pitch. If it's not a fit, I'll tell you straight. We map the 3 automations to your business and what to do first. Reach me at:
