

3 AI automations.

One page.

Turn DMs, comments and browsers into paying customers, whether you run a store, coach, or sell a service online. This is the short version, screenshot it and act on it. Want the full breakdown and the exact tools? See below.

1 Social DM to Sale

- PAIN** DMs and comments pile up while you work, and ready buyers go to another business.
- FIX** AI answers 24/7 (and says it's AI), then moves buyers forward and files leads in your CRM.
- START** List the 3 questions people always DM you (price, what's included, how to start), that's the AI's script.

2 AI Assistant on Your Website

- PAIN** A visitor has a question at 11pm, no one answers, so they bounce and buy elsewhere.
- FIX** A smart assistant on your site (chat + voice) knows your catalog and answers, recommends and sells 24/7.
- START** Feed it your prices, policies, and the 5 questions buyers ask before saying yes.

3 Follow-up & Reactivation

- PAIN** Warm leads go quiet, and old leads you paid for sit forgotten in your CRM.
- FIX** AI chases warm leads until they decide, and re-opens dead ones by message or AI voice call.
- START** Aim it at quiet repliers, abandoned carts, and old leads from the last 6 to 12 months.

⚡ **The edge:** reply within 5 minutes and you're about 21x more likely to win the lead (MIT), yet fewer than 1 in 10 businesses actually do it. An AI that answers instantly puts you in the winning tenth.
