

YOUR AI OPPORTUNITY ROADMAP

Start with Admin & Company Brain

Prepared for Elena · Professional / financial services

6-12 hrs

TIME BACK / WEEK

Focus pillar: **Admin & Company Brain**,
with gains in Marketing & Growth.

Based on your answers, here are the three systems that would give you the most time back and turn your knowledge into leverage, in the order we would build them. The pages that follow show exactly how each one works.

■ YOUR TOP 3 AUTOMATIONS TO START WITH

1

Custom RAG "Second Brain" over your documents

A private AI trained on your files and know-how. Ask in plain language, get sourced answers instantly.

2

Scan-to-Brain OCR

Photograph or scan any paperwork and it is digitised, structured, and filed automatically.

3

Automated content & reports from your knowledge

Turn your organised knowledge into draft reports, summaries, and content, ready to review and send.

Because your knowledge is scattered and reporting eats your week, we would start with your custom Second Brain.

Your best knowledge is trapped, and it never works for you.

Years of documents, contracts, and hard-won expertise sit in folders, inboxes, and people's heads. The problem is not that the knowledge is missing. It is that no one can find it fast, reporting is done by hand, and none of that expertise ever becomes visible to the market.

■ WHAT IT COSTS YOU, QUIETLY

Hours lost hunting for documents

The right file, clause, or past answer always exists somewhere. Finding it costs your team hours every week that no one is billing for.

Manual paperwork and re-typing

Invoices, forms, and contracts get keyed in by hand. It is slow, it is error-prone, and it is time nobody wants to spend.

Reporting done by hand, expertise unseen

Monthly reports are built manually from scratch, and the expertise that could feed your content and reputation never reaches a single client.

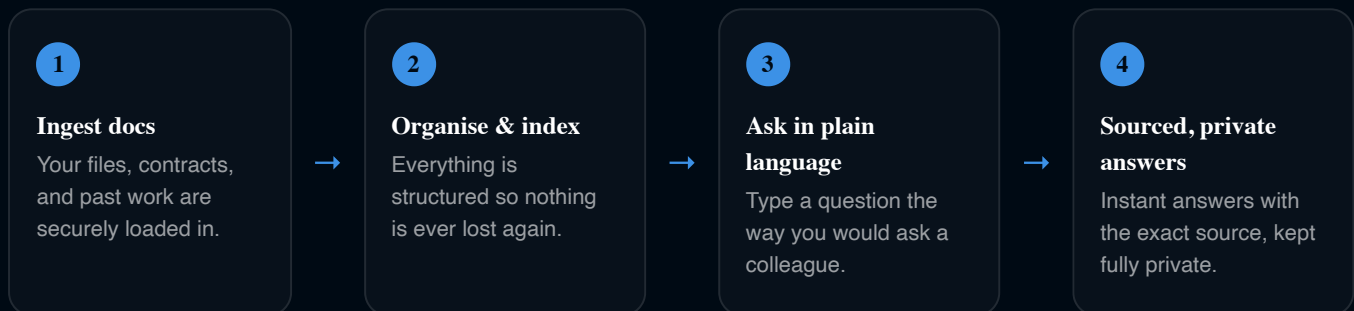

■ THE SHIFT

You do not need more knowledge. You need a system that captures it, organises it, and turns it into leverage: instant answers, self-drafting reports, and content that makes your expertise visible. That is what the next three automations do.

A custom "Second Brain" that knows everything you do.

A private AI trained on your own files, contracts, and know-how. This is not a generic chatbot. Ask a question in plain language and get an answer drawn straight from your documents, with the source cited, in seconds instead of a search that eats your afternoon.

■ HOW IT WORKS

■ WHAT YOU GET

- ✓ **Answers in seconds**
No more digging through folders, inboxes, or old contracts.
- ✓ **Nothing gets lost**
Every document and decision stays findable, forever.
- ✓ **Private and yours**
Trained only on your data, kept inside your control.
- ✓ **Every answer sourced**
See exactly which file the answer came from, every time.

BEFORE

A question about a past client or clause means opening five folders and asking two colleagues. Half the knowledge lives only in someone's head, and it walks out the door when they do.

AFTER

You ask the Second Brain and get a sourced answer in seconds. The whole team draws on the same knowledge, and expertise stays in the business even as people come and go.

Typical time back: a small professional team stops losing hours each week to document hunting and repeated internal questions.

Two systems that feed the brain and turn it into output.

AUTOMATION 02

■ SCAN-TO-BRAIN OCR

Photograph or scan any piece of paperwork and it is digitised, structured, and filed into your brain automatically. Invoices, forms, and contracts stop being a data-entry chore and become searchable knowledge the moment they arrive.

- Reads invoices, forms, and contracts and extracts the fields that matter.
- Ends manual re-typing and the errors that come with it.
- Files everything straight into the Second Brain, ready to query.

AUTOMATION 03

■ AUTOMATED CONTENT & REPORTS FROM YOUR KNOWLEDGE

Once your knowledge is organised, it can write for you. The system turns it into draft reports, summaries, and outward content (newsletters, FAQs, posts) with a simple review-and-send workflow, so your expertise finally becomes visible to the market.

- Drafts monthly reports and client summaries from your own data.
- Turns expertise into newsletters, FAQs, and posts you review and send.
- Can feed a reputation and review workflow that builds your presence.

WHAT THIS LOOKS LIKE

An illustrative picture for a business like yours.

ILLUSTRATIVE EXAMPLE

A financial and professional-services firm drowning in documents and manual monthly reporting.

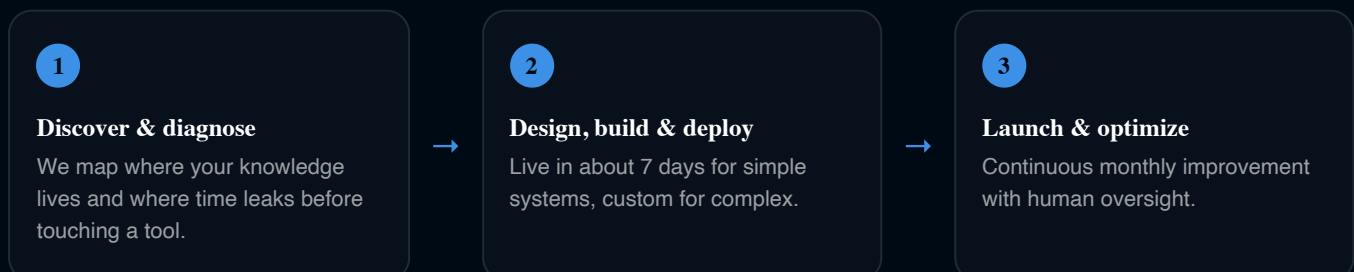

They hold thousands of client files, contracts, and invoices spread across folders and inboxes, and every month someone rebuilds reports by hand. After deploying the Second Brain plus Scan-to-Brain OCR and automated content, paperwork digitises itself the moment it arrives, monthly reports draft themselves for a quick review, and the firm's expertise starts feeding client-facing newsletters and FAQs. The result is hours of admin and reporting given back each week, and knowledge that finally works for the business instead of sitting idle.

Illustrative scenario for explanation, not a specific client result. Your numbers depend on your volume and setup.

■ WHAT YOU WOULD HAVE RUNNING AFTER MONTH ONE

- A private Second Brain that answers questions from your documents in seconds, with sources.
- New paperwork scanned and filed into the brain automatically, with no manual data entry.
- Reports and content drafting themselves from your knowledge, ready for a quick review and send.

■ HOW WE WOULD BUILD IT, IN ABOUT 7 DAYS

Want us to build these three systems for you?

This roadmap is yours to keep. If you would like these automations running in your business, the fastest way forward is a short discovery call. No pitch deck, no obligation.

■ YOUR THREE SYSTEMS, RECAPPED

1

Custom RAG "Second Brain" over your documents

Ask in plain language, get sourced answers from your own files instantly.

2

Scan-to-Brain OCR

Scan any paperwork and it digitises, structures, and files itself.

3

Automated content & reports from your knowledge

Reports and content that draft themselves, ready to review and send.

■ WHAT HAPPENS ON THE CALL

- We look at where your knowledge lives today and where your time leaks.
- We tell you which of the three systems would move the needle first.
- You leave with a clear, honest view of what it takes and what it returns, whether or not you work with us.

Book your free discovery call

30 minutes. We map where your knowledge is stuck and how to turn it into leverage.
