

MARKETING & AI AUDIT · SAMPLE

See exactly where a business leaks **time** and **money**

A real Jumpstart Audit, anonymized. We map where leads, hours and revenue slip away, then hand over a phased plan with the ROI attached and one quick win delivered inside the audit. This is the exact depth you get for your own business.

01

SCOPE & OBJECTIVES

Why we're here

Lead capture lived in Google Sheets with no CRM: form tabs by source and manual "Worked" follow-ups. Copy-paste, inconsistent statuses, little KPI visibility.

THE QUICK WIN

One automation goes live **inside the audit**: instant speed-to-lead, response time from hours to seconds.

AUTOMIS.AI/JUMPSTART-AUDIT

WHAT THIS AUDIT SETS OUT TO FIX

- 01 Turn more ad leads into booked appointments** and cut acquisition and handling cost.
- 02 Replace manual sheet work** with light automations that lift speed-to-lead and recover missed calls.
- 03 Unify the data** into a Master Leads view with clean statuses and UTMs, so KPIs are finally visible.
- 04 Give leadership a phased plan** with clear ROI, owners and timing, and one quick win delivered live.

What we audited

Lead capture in Google Sheets (no CRM): form tabs by source, paid ads and SMS-verified, plus "Worked" follow-up tabs. Manual copy and paste, inconsistent statuses, limited KPI visibility.

The objective in one line

Catch every lead the second it lands, answer and book automatically, and make the whole funnel measurable, without adding headcount.

02

OPPORTUNITY MATRIX

Impact vs effort

Every opportunity mapped by how much it moves the needle against how hard it is to ship, so we sequence the easy, high-impact work first.

SEQUENCE

Quick Wins first for immediate lift, then Big Swings, then Fill-ins as resources allow.

OPPORTUNITY MATRIX

IMPACT VS IMPLEMENTATION EFFORT

KPIs impacted: booking rate, cost per lead, show rate, speed-to-lead, data clarity, ROI tracking.

03

IMPLEMENTATION

A 12-week roadmap

Three phases. Quick wins create immediate lift and fund confidence, the mid phase recovers missed demand, the final phase makes it scalable.

MOMENTUM

Value ships in **week one**, not month three.

12-WEEK ROADMAP

PHASED EXECUTION PLAN

1

PHASE 1 • WEEKS 1 TO 4

Quick Wins & Foundation

- Sheet cleanup: a Master Leads tab, standardized status dropdowns, UTM columns, and "not contacted over 24h" conditional formatting.
- Quick win live: instant speed-to-lead, an automatic SMS or WhatsApp to the lead plus a rep alert on every new row.
- Visibility: a pivot dashboard and a daily KPI digest email at 07:00.

OUTCOME

Faster response and one clean source of truth.

2

PHASE 2 • WEEKS 5 TO 8

Recovery & Reactivation

- Missed-Call Rescue: an automatic SMS with a booking link on any "Missed or Voicemail" outcome.
- Reactivation Drip: automatic follow-ups for no-shows and lost leads, starting 7 days after they go cold.
- Dashboard segments locked in by source (Google Ads, TikTok, SMS-verified).

OUTCOME

Recovered demand and fewer no-shows.

3

PHASE 3 • WEEKS 9 TO 12

Scale & Prep

- Harden UTM and campaign capture from the ad forms straight into the sheet.
- Expand the KPI view end to end: Leads to Contacted to Booked to Attended, by channel and campaign.
- Light playbooks and handoff, then assess promoting the whole structure into a CRM.

OUTCOME

Full attribution and a scale-ready setup.

Master Leads Tab

From scattered data across many tabs to one unified, self-updating source of truth.

TIME BACK

3 hours a week of manual entry, gone. One day to implement.

FROM SCATTERED TABS TO ONE SOURCE OF TRUTH

CURRENTLY

- Leads scattered across separate tabs by service and source, creating silos.
- Manual copy and paste causing errors, duplicates and wasted time.
- Inconsistent statuses and no standardized follow-up tracking.
- Limited KPI visibility, no easy way to track sources or conversion.

WITH AUTOMATION

- One Master Leads Tab fed automatically from every form tab.
- Automated data flow removes copy-paste: one source of truth.
- Standardized status dropdowns with "not contacted over 24h" formatting.
- Auto-appended UTMs for accurate source and campaign attribution.

FUTURE PROCESS FLOW

Missed-Call Rescue

From lost opportunities to automated recovery within seconds of a missed call.

RECOVERED DEMAND

Up to **30% of missed calls** won back, response in seconds.

FROM LOST CALLS TO AUTOMATED RECOVERY

CURRENTLY

- Missed calls logged but no action taken, a real lost-opportunity cost.
- Manual callbacks required, often forgotten or delayed.
- Interested prospects lost for lack of timely follow-up.
- No metrics on recovery or resolution rates.

WITH AUTOMATION

- Auto-SMS with an apology and a booking link the moment a call is marked "Missed".
- Response within seconds, while the prospect is still looking.
- Direct booking from the SMS removes friction from rebooking.
- Tracked recovery rates give visibility into recaptured demand.

05

THE MONEY SLIDE

Return on investment

An investment of roughly €4,170 is projected to save €63,900+ per year, reinvested into higher-value work.

PAYBACK

Under **1 month**, then 588 hours a year handed back.

ROI SUMMARY

RETURN, OPPORTUNITY BY OPPORTUNITY

AI SOLUTION	MONTHLY HRS	ANNUAL FTE SAVED	PROJECTED REVENUE	IMPL. COST	YEAR-1 ROI
Instant Speed-to-Lead	10	€3,000	€24,000	€1,390	1844%

Source: client-provided operational data. Revenue figures are illustrative projections, not guarantees. Assumptions: all hourly rates at €25 per hour. ROI combines cost savings and projected added revenue.

06

META ADS AUDIT

Where the budget works

Last 90 days. Leads arrive at a workable cost, but performance swings widely across service areas.

THE LEAK

General Dentistry is the weak spot: highest CPL, lowest CTR. Shift budget to Implants.

€12,480

Total spend, 90 days

€42.16

Average cost per lead

3.74%

Click-through rate

8.2%

Lead conversion

COST PER LEAD BY SERVICE AREA

Practice average CPL €42.16 - gold = worst performer

Implants show the strongest performance (lowest CPL, highest CTR), about 35% below the practice average. Specialty services drive roughly 75% of all leads.

Cut CPL, lift bookings

Reallocate to what works, tighten targeting and creative, and remove friction on the way to booking.

EXPECTED OUTCOME

20 to 30% lower CPL and
+35% bookings from the
same spend.

Budget reallocation

- Shift 40% of General Dentistry budget to Implants.
- Raise the daily cap on the highest-CTR weekend campaigns.

Targeting

- Narrow age range to 35 to 65 (80% of bookings).
- Add a custom audience from the existing patient database.

Creative

- Replace underperforming General Dentistry creatives.
- Add testimonial overlays to the top Implants ads.

Conversion

- Instant booking CTAs and a WhatsApp button on mobile landing pages.
- Cut form fields from 8 to a maximum of 4.
- Specialty-specific landing pages matched to each ad.

Campaign structure

- Restructure ad sets by audience, not by service.
- Day-parting to focus spend on 8 to 11am and 4 to 8pm.
- Automated rules for budget pacing by performance.
