

YOUR AI OPPORTUNITY ROADMAP

Start with Marketing & Growth

Prepared for Luca · Local business / services

4-8 hrs

TIME BACK / WEEK

Focus pillar: **Marketing & Growth**, with gains
in Admin & Company Brain.

Based on your answers, here are the three systems that would make you easier to find and harder to ignore, in the order we would build them. The pages that follow show exactly how each one works, and why it runs almost entirely on autopilot.

■ YOUR TOP 3 AUTOMATIONS TO START WITH

1

SEO & GEO visibility in Google and AI search

Get found by people searching on Google and by AI assistants when they recommend a business like yours.

2

Automated content engine

A hands-off pipeline that turns your expertise into a steady stream of on-brand content.

3

Reputation & review automation

Quietly grows your reviews and keeps your rating and profiles strong.

Because customers cannot easily find you and you have no time for content, we would start with SEO and GEO visibility.

You are invisible at the exact moment buyers are searching for you.

When someone needs what you offer, they do not walk in cold. They search, on Google and, more and more, by asking an AI assistant. If you do not show up in those answers, you are not in the running at all. The customer never sees you, never hears of you, and never knows what they missed. Neither do you.

■ WHAT IT COSTS YOU, QUIETLY

Competitors show up first

Most buyers research online before they ever contact anyone, and the vast majority never scroll past the top few results. If your rivals rank and you do not, they win the click by default.

Your presence is inconsistent

A dated site, half-filled profiles, and long silences on social make it hard to trust you and hard for search engines to rank you. There is simply no time to keep it all fresh.

Thin reviews, and AI recommends someone else

With few recent reviews, both people and AI assistants lean toward the business that looks more established. Every search you do not show up for is a customer you never knew you lost.

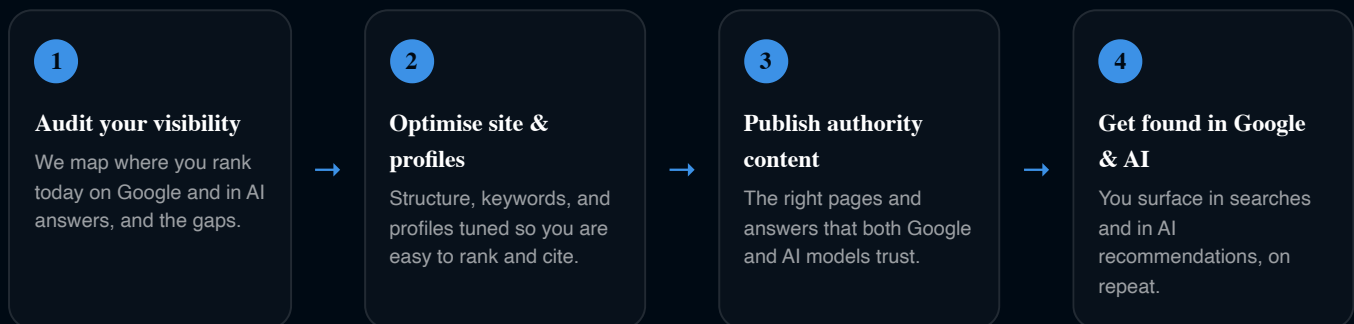

■ THE SHIFT

You do not need a marketing team or more hours in the day. You need a system that builds durable visibility and authority, on Google and in AI search, and keeps it strong without you writing a word. That is what the next three automations do.

Get found in Google and in AI search, on autopilot.

This is SEO for the way people search now. We make you rank for the terms your buyers use on Google, and we make sure AI assistants like ChatGPT, Gemini, and Google AI Overviews name you when someone asks them to recommend a business like yours. It runs continuously in the background, so your visibility keeps compounding without your time.

■ HOW IT WORKS

■ WHAT YOU GET

- ✓ **Rank where buyers look**
Show up on Google for the searches that actually bring you customers.
- ✓ **Named by AI assistants**
Be the business AI tools recommend when asked for someone like you.
- ✓ **Authority that compounds**
Every optimised page and profile keeps working for you long after.
- ✓ **No marketing team needed**
The heavy lifting is automated, with a light human review step.

BEFORE

You barely appear on Google for your own services, and never in AI answers. Your site and profiles sit untouched for months. Buyers find your competitors first and assume they are the only option.

AFTER

You rank for the searches that matter and get named in AI recommendations. Your site and profiles stay fresh automatically. New customers find you before they ever hear of the competition.

Typical time back: you stop trying to fit content, SEO, and profile upkeep into evenings you do not have, and it simply runs in the background instead.

Two systems that keep you visible and trusted, hands-off.

AUTOMATION 02

■ AUTOMATED CONTENT ENGINE

A hands-off pipeline that turns your expertise into a steady stream of on-brand content: posts, articles, and FAQs that feed both your audience and the search engines. You are not chained to a content calendar, and you never have to write it all yourself.

- Drafts on-brand posts, articles, and FAQs from your knowledge and services.
- A simple review-and-approve step keeps you in control of every word that goes out.
- Publishes on a steady cadence, so you stay visible without lifting a finger.

AUTOMATION 03

■ REPUTATION & REVIEW AUTOMATION

Reviews are trust signals for both buyers and AI assistants. This system automatically asks your happy customers for a review at the right moment, quietly routes unhappy ones to you in private first, and keeps your rating and profiles strong, all without you chasing anyone.

- Requests reviews from happy customers automatically, right after a good experience.
- Routes unhappy feedback privately to you before it ever becomes a public review.
- A simple dashboard shows your rating and visibility trend at a glance.

An illustrative picture for a business like yours.

ILLUSTRATIVE EXAMPLE

A local service business that barely appears in search and never in AI answers.

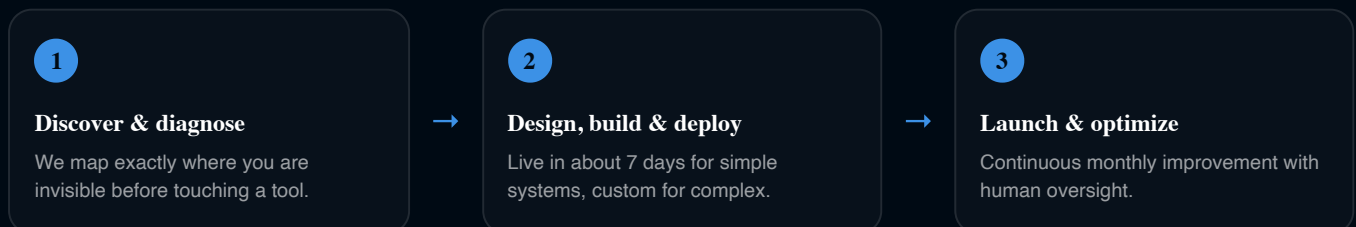

They have a decent reputation with the customers they win, but almost no online presence to prove it: they rank for hardly any local searches, never come up when someone asks an AI assistant for a recommendation, and carry only a handful of old reviews. After SEO and GEO optimisation, the content engine, and review automation, they start showing up for the local searches buyers actually make and get named in AI recommendations. Fresh content publishes on a steady cadence, reviews climb month after month, and all of it runs on autopilot with just a light approval step.

Illustrative scenario for explanation, not a specific client result. Your numbers depend on your volume and setup.

■ WHAT YOU WOULD HAVE RUNNING AFTER MONTH ONE

- Ranking for the local searches that matter and getting named in AI recommendations.
- A steady stream of on-brand content publishing automatically, with your quick approval.
- A rising review count and consistent profiles, kept strong without you chasing anyone.

■ HOW WE WOULD BUILD IT, IN ABOUT 7 DAYS

Want us to build these three systems for you?

This roadmap is yours to keep. If you would like these automations running in your business, the fastest way forward is a short discovery call. No pitch deck, no obligation.

■ YOUR THREE SYSTEMS, RECAPPED

1

SEO & GEO visibility in Google and AI search

Get found by people searching on Google and by AI assistants when they recommend a business like yours.

2

Automated content engine

A steady stream of on-brand content, published for you, with a quick approval step.

3

Reputation & review automation

Grows your reviews and keeps your rating and profiles strong, hands-off.

■ WHAT HAPPENS ON THE CALL

- We look at where buyers search for you today and where you are invisible.
- We tell you which of the three systems would move the needle first.
- You leave with a clear, honest view of what it takes and what it returns, whether or not you work with us.
