

YOUR AI OPPORTUNITY ROADMAP

Start with Sales & Acquisition

Prepared for Giulia · Healthcare / clinic

5-11 hrs

TIME BACK / WEEK

Focus pillar: **Sales & Acquisition**, with gains in Admin & Company Brain.

Based on your answers, here are the three systems that would capture the most inbound opportunities and give your front desk the most time back, in the order we would build them. The pages that follow show exactly how each one works.

■ YOUR TOP 3 AUTOMATIONS TO START WITH

1

24/7 AI Voice Agent (inbound)

Answers every incoming call, qualifies the caller, and books them straight into your calendar, around the clock.

2

Missed-call to instant SMS recovery

Any call you cannot take triggers an instant friendly text, so the caller never drifts to a competitor.

3

Web & WhatsApp inquiry routing + auto booking

Every form and message captured, answered, and turned into a booked appointment automatically.

Because most of your leads come in by phone and you are losing time to missed calls, we would start with the inbound Voice Agent.

You are already generating demand, then letting the phone ring out.

People are trying to reach you: they call, they fill in the form, they message on WhatsApp. The problem is almost never getting noticed. It is what happens in the moment someone reaches out, when your front desk is mid-appointment, the line is busy, or the day is over and nobody is there to answer.

■ WHAT IT COSTS YOU, QUIETLY

Calls ring out unanswered

Many small businesses miss a real share of incoming calls while serving clients. A missed call is a warm, ready-to-book customer handed to whoever answers next.

The 5-minute window closes

A caller who reaches a person or gets a reply within 5 minutes almost always books. Leave them waiting and they simply call the next name on their list.

After-hours inquiries vanish

Calls and messages that land in the evening, at lunch, or on weekends sit unanswered until you reopen. By then most of those people have already booked elsewhere.

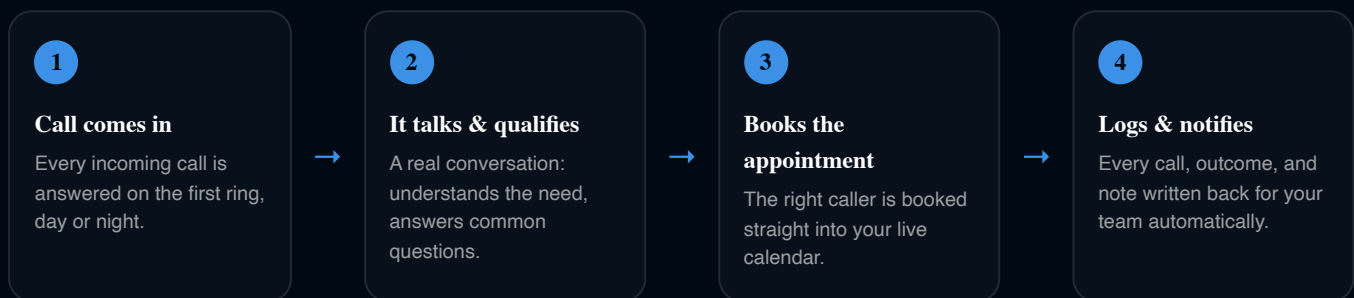

■ THE SHIFT

You do not need more demand. You need a reception that never sleeps, never misses a call, and turns every inquiry into a booked appointment while your team stays focused on the client in front of them. That is what the next three automations do.

A 24/7 AI Voice Agent that answers every **incoming** call.

Built on our VoiceAI stack, this is not a chatbot. It is a natural-sounding voice agent that picks up every call to your business, qualifies the caller, answers their questions, and books them straight into your calendar, 24/7, even when you are with a client or closed for the day.

■ HOW IT WORKS

■ WHAT YOU GET

- ✓ **Never miss a call again**
Every incoming call answered in seconds, at any hour, 365 days a year.
- ✓ **Reception on autopilot**
Callers qualified and answered without a human touching the phone.
- ✓ **Your calendar fills itself**
The right callers booked straight in, ready and confirmed.
- ✓ **Your front desk stays present**
No more juggling the phone mid-appointment, so staff stay with the client.

BEFORE

The phone rings while your team is treating a client, so it goes unanswered. Evenings and weekends, nobody picks up. Every missed caller is a booking lost to the next clinic on the list.

AFTER

Every call is answered on the first ring, at any hour. Callers are qualified and booked automatically, your front desk stays with the client, and you wake up to a fuller calendar.

Typical time back: a front desk stops interrupting appointments to grab the phone, and stops losing every after-hours and busy-line caller entirely.

Two systems that make sure no inquiry ever goes unanswered.

AUTOMATION 02

■ MISSED-CALL TO INSTANT SMS RECOVERY

Even with the Voice Agent, some callers hang up before connecting or reach you on a channel you have chosen to keep human. The instant a call goes unanswered, they get a friendly text inviting them to book or reply, so a warm caller never drifts to a competitor while they wait.

- Fires within seconds of any missed or dropped call, 24/7.
- A warm first-touch text keeps the caller engaged and offers a booking link.
- Hands the conversation back to the Voice Agent or your team to close.

AUTOMATION 03

■ WEB & WHATSAPP INQUIRY ROUTING + AUTO BOOKING

Not everyone calls. Web forms, WhatsApp messages, and social inquiries land at all hours and often sit while your front desk is busy. This system captures every one, replies instantly, answers the common questions, and books the appointment, all without a human touching it.

- Every form, chat, and message captured and answered in seconds, day or night.
- Routes each inquiry to the right service and offers live calendar slots.
- Turns a stray message into a confirmed booking, hands-free.

An illustrative picture for a business like yours.

ILLUSTRATIVE EXAMPLE

A dental clinic with a busy front desk and a single reception line.

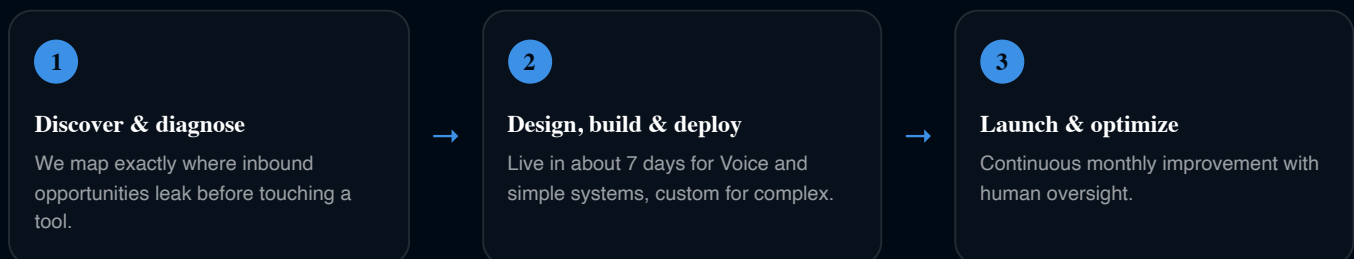

They take a steady stream of calls, but a chunk ring out while the team is treating patients, and after-hours callers reach nobody at all. Web and WhatsApp inquiries sit until someone has a spare moment. After deploying the inbound Voice Agent plus missed-call SMS, every caller is answered on the first ring and booked, after-hours inquiries convert instead of vanishing, no-shows drop thanks to automatic reminders, and the front desk is freed up to focus on the patients in the room.

Illustrative scenario for explanation, not a specific client result. Your numbers depend on your volume and setup.

■ WHAT YOU WOULD HAVE RUNNING AFTER MONTH ONE

- Every incoming call answered on the first ring and booked, day or night, with no one at the desk.
- Every web and WhatsApp inquiry captured, answered, and turned into an appointment automatically.
- Every call outcome and note written back for your team, so nothing is missed and your front desk is freed up.

■ HOW WE WOULD BUILD IT, IN ABOUT 7 DAYS

Want us to build these three systems for you?

This roadmap is yours to keep. If you would like these automations running in your business, the fastest way forward is a short discovery call. No pitch deck, no obligation.

■ YOUR THREE SYSTEMS, RECAPPED

1

24/7 AI Voice Agent (inbound)

Answers every incoming call, qualifies the caller, and books them straight into your calendar.

2

Missed-call to instant SMS recovery

Any missed call triggers an instant text, so the caller never goes to a competitor.

3

Web & WhatsApp inquiry routing + auto booking

Every form and message captured, answered, and booked, hands-free.

■ WHAT HAPPENS ON THE CALL

- We look at where your inbound calls and inquiries actually come from and where they leak.
- We tell you which of the three systems would move the needle first.
- You leave with a clear, honest view of what it takes and what it returns, whether or not you work with us.
