

AI PLAYBOOK · FOR DENTAL & HEALTH CLINICS

The Clinic AI Playbook

3 AI automations that give your clinic back its time, and stop losing patients to a missed call. No big budget. No tech team. Just the right tools in the right places.

~85%

of calls handled automatically for the clinics we run this for, including every call that comes in from their Google Maps listing and their ads.

Steal it in 5 minutes

START HERE

You don't need a big budget to use AI in your clinic.

This is not theory. These are 3 automations we build for real clinics today. Each one fixes a problem you already have: calls you miss, chairs that sit empty, and reviews you never get. Read it in 5 minutes. Steal what fits, or let us build it for you.

WHAT'S INSIDE

1 The 24/7 Booking Agent

An AI that answers your phone and books patients around the clock, even at 11pm.

2 The No-Show Reducer

Automatic reminders that quietly cut the empty chairs in your calendar.

3 The Review Engine

Turns your happy patients into 5-star Google reviews, the right way.

► TWO WAYS TO DO THIS

Each automation names easy tools you can try yourself. Here's the honest difference:

- **Try it yourself:** simple, low-code tools (Synthflow, Brevo, Make). Perfect for testing the idea.
- **Done by us:** pro-grade tools, EU-hosted, wired together and tuned on your real calls, and every AI assistant says it's AI (ready for the 2026 EU rules).

The 24/7 Booking Agent

THE PROBLEM

Nights, lunch and busy mornings go to voicemail, and most people who reach a voicemail don't leave one. They just call the next clinic, and that patient is gone.

WHAT IT DOES

An AI voice agent answers 24/7. It sounds human, tells callers it's an AI assistant, handles the common questions, and books straight into your calendar.

WHAT CHANGES

Patients book around the clock, and you stop losing after-hours calls, with no extra front-desk work.

23:00

A dental clinic we run this for books new patients even at 11 at night, while the practice is closed.

⚡ **Insider:** ~8 in 10 patients want to book online, and about half of online bookings land after hours (Experian; Zocdoc). A closed clinic hands those bookings to a competitor.

► DO THIS FIRST

These 5 questions cover most patient calls. Write your clinic's answer to each, and the agent is ready to book:

- Do you take my insurance or plan?
- What are your opening hours?
- How much is a first visit or a cleaning?
- What is the soonest free appointment, and where are you?

EASY TOOLS TO TRY: Synthflow · Vapi · Google Calendar

The No-Show Reducer

THE PROBLEM

Every no-show is an empty chair and lost income, and having your team phone every patient to confirm eats hours that should go to care.

WHAT IT DOES

It sends automatic WhatsApp and SMS reminders before each appointment, with a one-tap way to confirm or move it.

WHAT CHANGES

Fewer empty slots, and nobody has to chase anyone. Clinics we work with see a clear drop in no-shows.

1 in 3

Automatic reminders cut no-shows by roughly a third once they replace the phone chase.

⚡ **Insider:** the hard part isn't sending reminders, it's syncing them to your calendar in real time so a reschedule never leaves a hole. That sync is where DIY setups quietly break.

► DO THIS FIRST

Set these 3 automatic messages once, and no one on your team has to pick up the phone:

- 48 hours before: a friendly confirm, one tap for yes or reschedule.
- Morning of: the time, address and parking in one short message.
- 2 hours before: a final nudge with a reschedule link, just in case.

EASY TOOLS TO TRY: Brevo · WhatsApp Business

The Review Engine

THE PROBLEM

You give great care, but you have far fewer Google reviews than you deserve. When someone searches nearby, the clinic with more stars wins the patient.

WHAT IT DOES

After a visit it invites patients to leave a Google review, and gives you a separate, private way to catch and fix problems early. It asks everyone, not just the happy ones.

WHAT CHANGES

More 5-star reviews, more trust, and more new patients choosing your clinic over the one down the road.

84%

of patients check online reviews before choosing a clinic (rater8, 2025).

⚡ Insider: never filter unhappy patients out before Google, it breaks Google's rules and can wipe every review you have. Ask everyone, and fix problems on your private channel instead.

► DO THIS FIRST

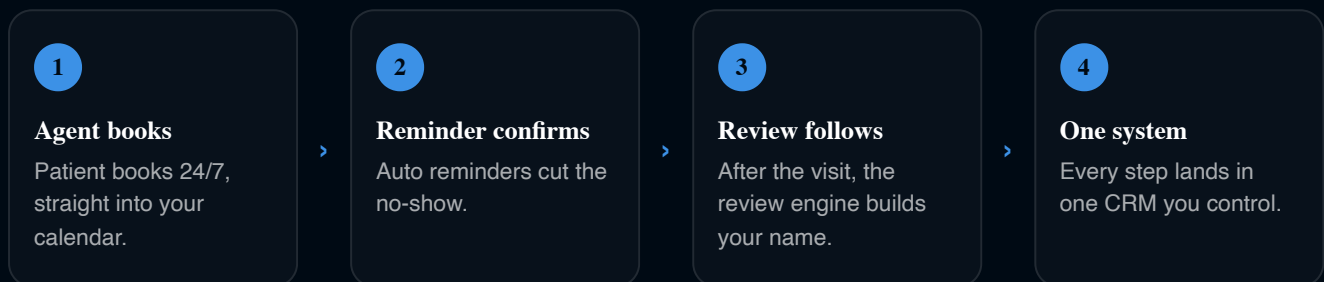

Four simple rules turn happy visits into 5-star reviews, the compliant way:

- Ask every patient, not just the happy ones.
- Send one message with a direct, one-tap Google link.
- Ask right after checkout, while the visit is fresh.
- Catch unhappy feedback on a private form, to fix it, not hide it.

EASY TOOLS TO TRY: Google Business Profile · Brevo

The magic isn't one automation. It's when they **connect**.

Each one helps on its own. The big jump happens when they work together, as one connected system that feeds one place you can actually see.

⚡ **Insider:** a clinic handles health data, the most protected kind there is. We keep it in the EU, limit it to what's clinically needed, and log who accessed it, so booking and reminders run on solid legal ground.

► WHERE MOST CLINICS START

You don't do all three at once. In our experience the order that pays off fastest is:

- Start with the 24/7 Booking Agent. It stops the most obvious leak: lost calls.
- Add reminders next, to protect the bookings you just won.
- Turn on reviews last, to bring in the next wave of patients.

YOUR NEXT STEP

Want these built for your clinic?

- 1 Follow [@arcangelo.automis](#) for daily, simple AI tips you can actually use.
- 2 Want the full setup done for you? Book a free call and we'll show you exactly what fits your clinic.

WANT TO BUILD IT YOURSELF?

You can. The easy tools here get you started. The catch is the time: wiring each piece together and testing it on real calls until it sounds right takes weeks. We build it with pro-grade, EU-hosted tools so it's reliable and GDPR-safe from day one.

Book a free call

30 minutes, free, no pitch. If it's not a fit, I'll tell you straight. We map the 3 automations to your clinic and what to do first. Reach me at:
